

## TTC announce new partnership with market leader Covind

TTC are pleased to announce an exciting new partnership with Covind, a specialised manufacturer with 35 years of experience in designing, manufacturing and marketing of body parts and components for trucks and commercial vehicles. This is an exciting addition to TTC's ever expanding parts product portfolio and partnerships with industry leading brands.

Based in Turin, Covind are a well-established brand in Europe and offer the largest range of body parts to the CV market, with over 7,000 items in the range plus a further 300 new items becoming available this year.

Covind offer OEM equivalent parts, but at a very competitive price and as a TÜV approved supplier, quality is assured. Their range of body parts are regularly inspected throughout the entire manufacturing process to ensure the highest quality and the use of ISO quality procedures ensures consistency and homogeneity in all Covind product.

Matteo Spada, Export Area Manager at Covind commented: "We have chosen TTC as a distributor for Covind body parts as we believe they have the right structure to ensure full coverage of the CV market and the experience and expertise to help make Covind as well known a brand in the UK as it is in Europe."

Darren Miller, Head of Marketing at TTC commented: "This is a new market for TTC and we are delighted to be partnering with such a highly respected brand name. Covind are innovators and very pro-active in the market place, with a long history and pedigree of delivering high quality product. There is a huge demand in the CV market for high quality body parts and Covind's 50,000 sq ft, state-of-the-art warehouse is well equipped to meet that need."

TTC will be offering Covind body parts to its customers from June 1st. Customers can view product details by requesting a hard copy catalogue or online on E-books via TTC Online.
